

Design. Fabrication. Integration.

Who We Are

Precision Industrial Equipment (PIE) is an industrial equipment design, fabrication, and integration company.

With superior engineering services and ability to integrate multiple pieces of technology into one line, PIE provides universal services from design to delivery. PIE's industrial lines can receive and palletize any product for a ready-to-ship solution.

- 1 Design & Engineering Expertise**
PIE's engineers employ Solid Works 3D drawings and AutoCAD technology to design custom integrated systems and increase efficiency through automation
- 2 Custom Fabrication & Control System Production**
PIE stands above its competition with the highest-grade materials and custom services, from laser cutting of individual metals to designing control systems for complex integrated lines
- 3 Systems Integration**
With decades of industrial automation expertise, PIE integrates multiple processes, technologies, and equipment lines to provide a turnkey solution

Our Services

Machine Cutting

Field Installation

Custom Metal Design

Industrial Equipment

Production Lines

Design & Drafting

Custom Prototyping

Project Management

F3103164

Equipment

Dumpers

Raw Product Conveyors

Wash Systems

Choppers

Destoning

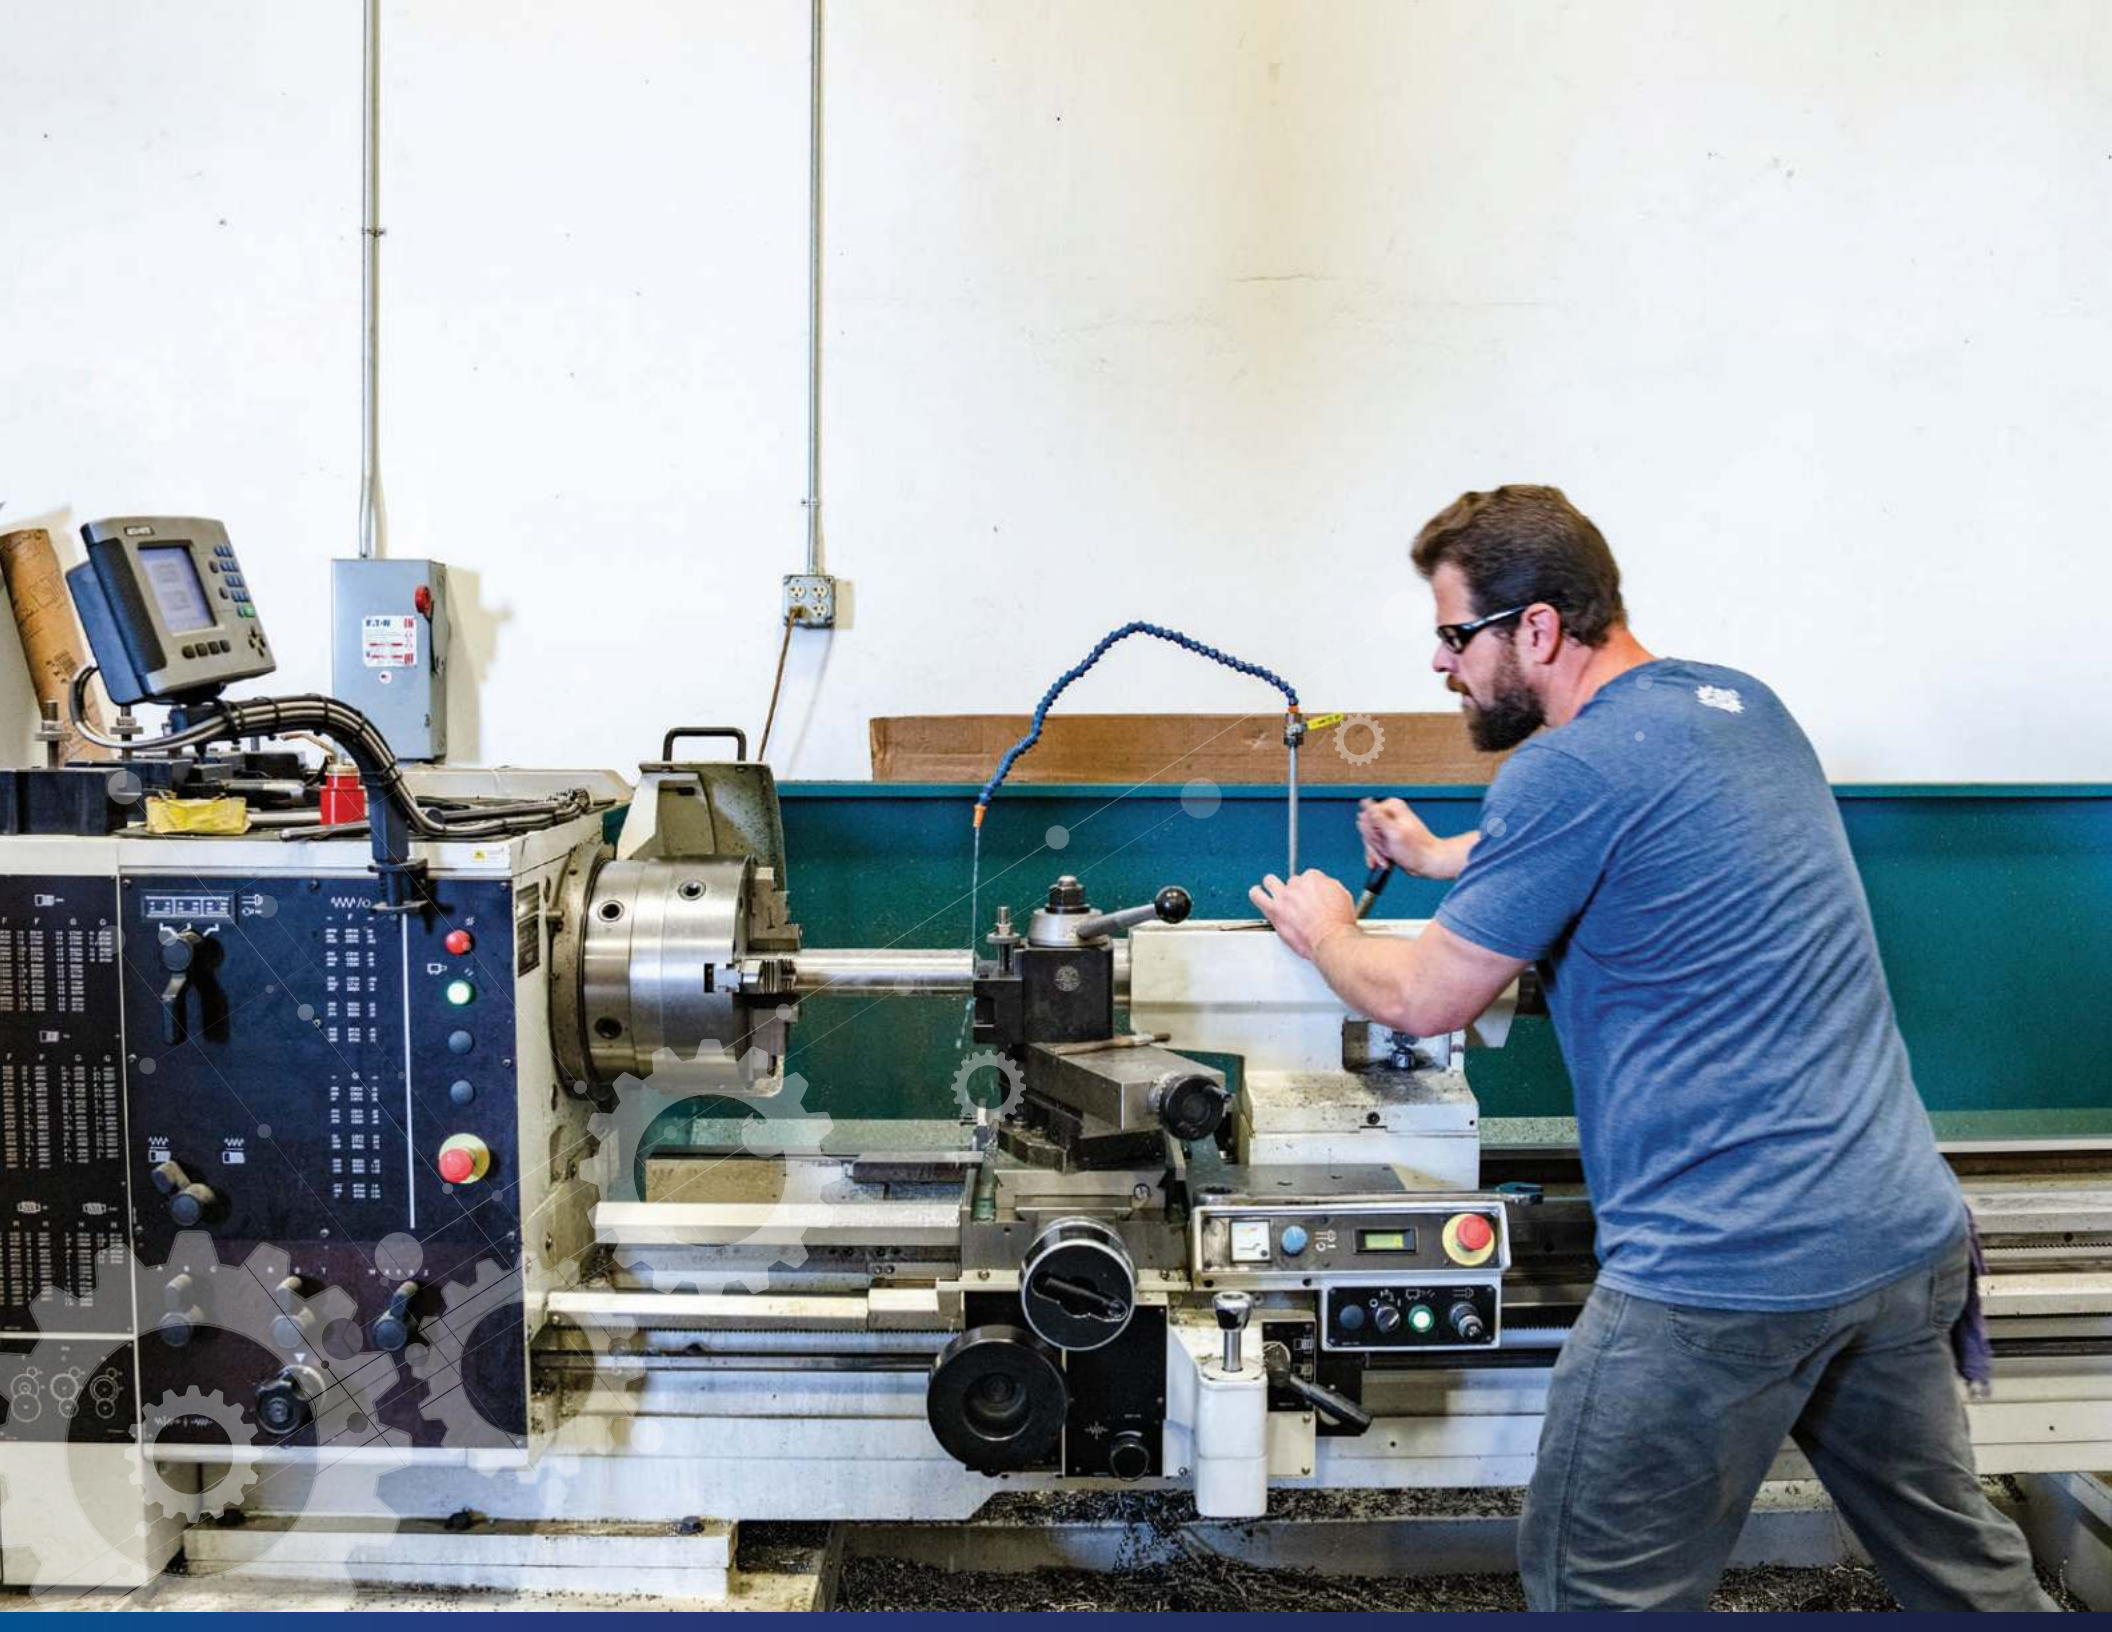

Negative Air Systems

Packaging Equipment

Integrated Control Systems

Our Employees

15

Shop Fabricators

We produce best-in-class light gauge sheet metal components for commercial and industrial uses

4

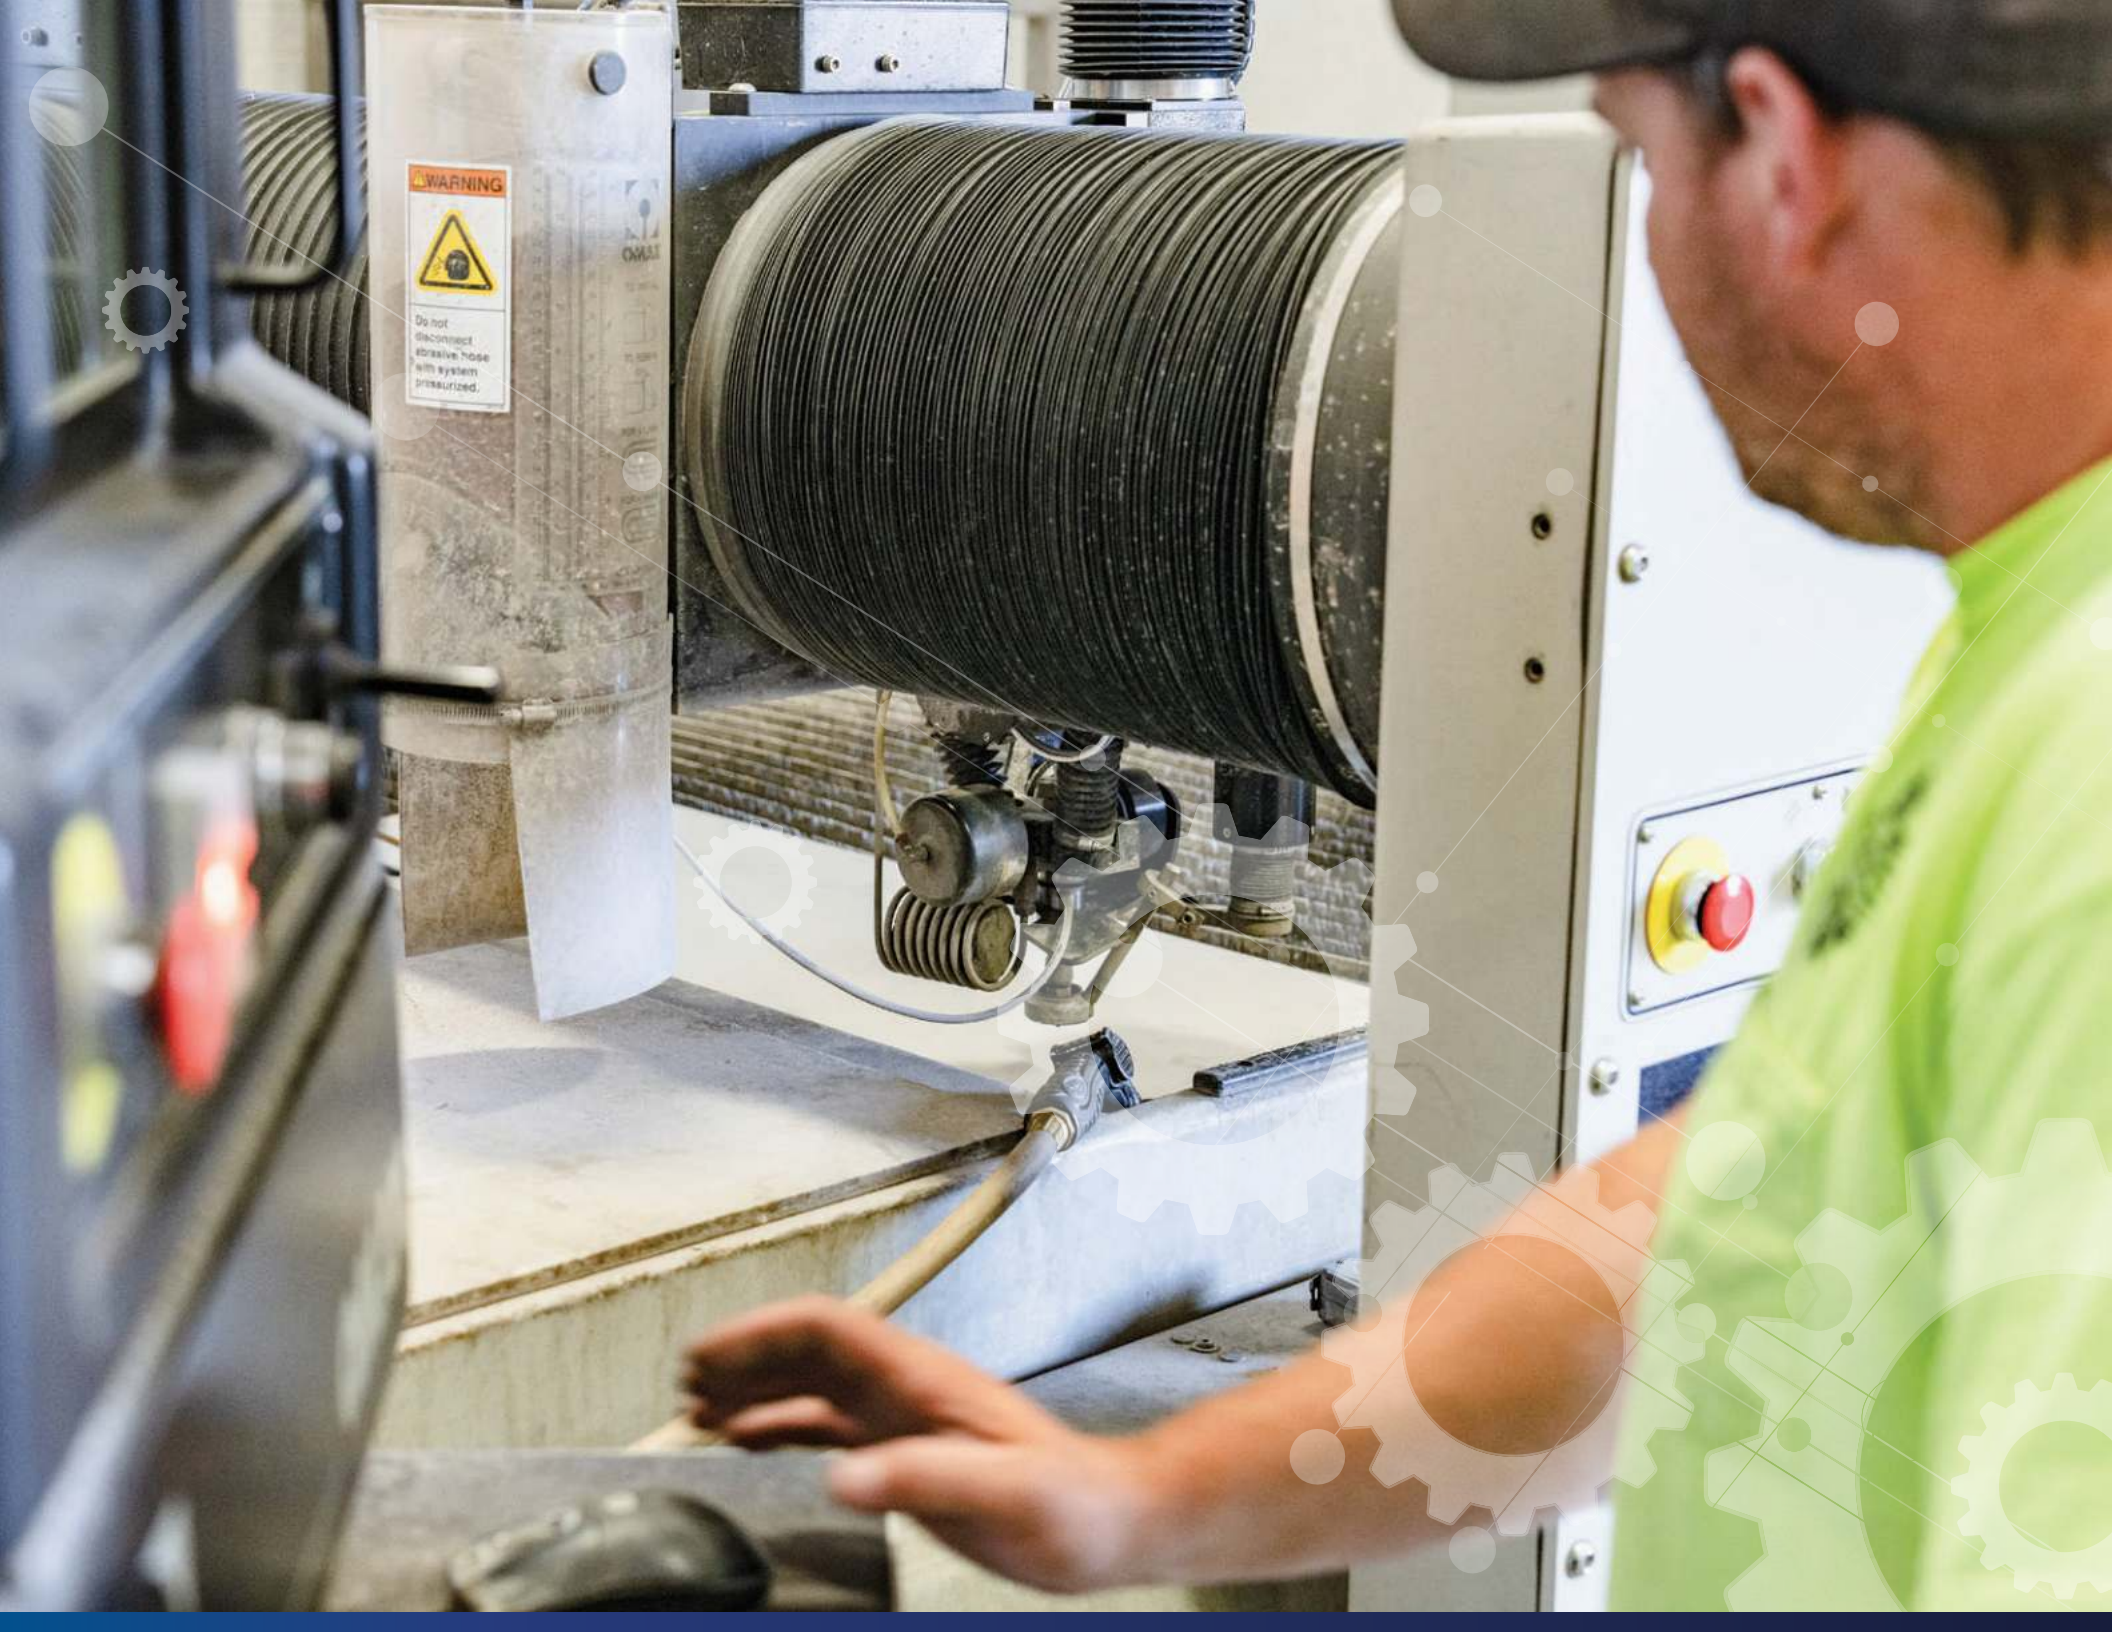

Engineers

Our mechanical engineers employ the latest CAD technology to design end items and CNC machined parts from concept to delivery

4

Project Managers

We have 50 years of experience as subject matter experts to forecast on-time and under-budget projects

PIE - A Committed Partner

Let us know how we can help you!

Please reach out to us for inquiries about your next project or for questions about our company.
